

CODECOLX · DIGITAL PORTFOLIO

We turn challenges into digital products.

We design and develop applications, websites, custom software, and digital solutions connected to your business.

SERVICES

Four capabilities. One connected system.

We design and develop applications, websites, custom software, and digital solutions connected to your business.

01 App development

Turn an idea or service into a clear mobile experience that is ready to grow.

02 Web design and development

Present the business clearly and open a digital channel for opportunities.

03 Custom software

Solve specific processes that generic tools do not cover.

04 Digital solutions

Connect information, automation, and sales channels without friction.

THE PATH

A clear process to move forward.

From discovery to launch, each stage turns information into decisions and concrete results.

01 **Discovery**

We understand the challenge, context and priorities to define a useful scope.

02 **Design**

We turn what we learn into a clear experience and a solution ready to validate.

03 **Development**

We build, integrate and test every part, with ongoing visibility throughout the process.

04 **Launch**

We prepare the release, verify the solution and support its rollout.

SELECTED CASES

Projects that make the outcome visible.

A selection of digital experiences built to position, explain, and convert.

TECHNOLOGIES AND TOOLS

Technology in service of the business.

 Next.js	 React
 TypeScript	 Node.js
 HTML5	 Python
 PostgreSQL	 Docker
 Vercel	 AWS
 Android	 iOS
 Swift / SwiftUI	 Kotlin

Technology is selected to solve the challenge, not to add complexity.

DIRECT CONTACT

Let's build what comes next.

Tell us the challenge. We connect strategy, design, and development to turn it into a useful solution.
